

Warm Up

Use the key terms in the box below to match with its definition.

transcription
translation
transfer RNA
ribosomal RNA
messenger RNA
codon

- 1) This is the set of three nitrogen bases used to make amino acids.
- 2) This happens when mRNA uses a copied DNA code to make protein.
- 3) This brings amino acids to ribosomes.
- 4) This carries the copied DNA code out to the cytoplasm.
- 5) This happens when RNA unzips and copies a DNA code.
- 6) This is the part of the RNA that makes up ribosomes.
