

Feel free to use your notes (list) from yesterday's video on Animal Adaptations.

Warm Up

- 1) This animal puffs his air sacks to attract a possible mate.
- 2) This animal has eight eyes for seeing prey and predators in almost any direction.
- 3) This animal can relax its jaw and quickly thrusts its teeth a little further forward to grasp on to its prey.
- 4) This animal kicks sand in its enemy's face.
- 5) This animal uses a wagon train defense tactic to protect against predators.

Musk Ox

Wolf Spider

Kangaroo Rat

Collared Lizard

Sage Grouse
