

What's your Bird Flu IQ?

WARM UP

Which of the following statements are myths (*not true*)?

1. Bird flu only infects birds.
2. It is safe to travel to countries affected by bird flu.
3. The current epidemic strain of bird flu has caused human deaths.
4. People have contracted bird flu from migratory birds.

5. You can catch bird flu by eating cooked chicken.
6. A human pandemic flu would only be risky to the old and frail or the very young (babies and toddlers).
