

# Warm Up

*Select the correct phase that corresponds with the description... Interphase ♦ Prophase ♦ Metaphase ♦ Anaphase ♦ Telophase ♦ Cytokinesis*  
*Stages CAN be used more than once!*

- 1) The cytoplasm divides, and the cell contents are separated into two separate cells.
- 2) Chromosomes become aligned along the equatorial plane of the cell.
- 3) Chromosome replication occurs.
- 4) Nuclear membrane disappears.
- 5) The two chromatids of a chromosome separate from each other.
- 6) Cytokinesis begins
- 7) DNA scrunches up and chromosomes are first visible.
