

Warm Up Identify the term(s) from the set of 5 that answer each question.

1. Which of these transport mechanisms requires an input of energy from a cell? (*osmosis, diffusion, facilitated diffusion, proton pump, endocytosis*)

2. What is the process in which the plasma membrane engulfs and takes in substances from a cell's environment? (*endocytosis, exocytosis, active transport, phagocytosis, pinocytosis*)

3. In exocytosis, the plasma membrane moves materials out of the cell with the help of a _____. (*protein, pump, vesicle, channel, carrier*)
