

## *Special product offers*

*We offer superior musk ox, caribou, and other large herbivores, perfectly contrasted by wolves, bears, and foxes.*

*Tundra is the exclusive choice for summer nesting grounds of many migratory birds.*

*Who needs plants? Not tundra. We're only populated by lichens, mosses, and dwarf shrubs.*

Musk Ox

Arctic Fox

## *Tundra*

**We don't need you here.**

**1-800-TUNDRAH**

## *Product distribution*

Tundra is placed in the most inaccessible places—so you know only the best can get here. However, we still cover almost 20% of the Earth's land surface, so there are plenty of destinations to choose from.

### **NEW SPECIAL OFFER!!**

If you don't feel like traveling to the poles, tundra has just expanded its distribution to include high mountaintops in ALL latitudes!!

Tundra offers up 60 cm of precipitation annually, but for dedicated visitors, we can occasionally exceed 100 cm.

Tundra's low temperatures help keep people who can't afford fur coats from ruining your vacation. Long, cold winters keep averages below -30 degrees Celsius. Short summers averaging less than 10 degrees Celsius also help.

In recent years, oil and mining companies have made tundra one of the most controversial biomes on the planet. Tundra always exceeds expectations.
